- Operations with fixed- or floating-point data

#### DSP vs. DSC

#### DSP

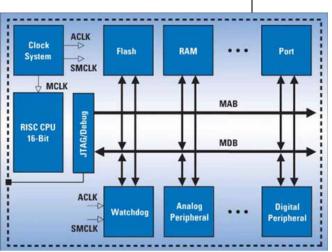

- High speed processing
- High speed external peripherals
- Lots of external memory
- Image & Video processing, powerful DSP algorithms

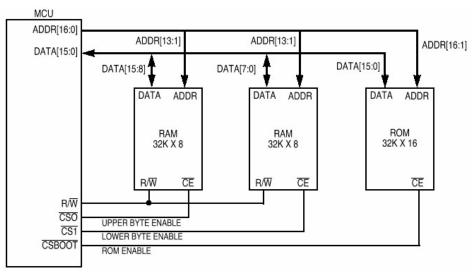

#### DSC

- Low to mid speed processing
- I/O type peripherals
- Applications: Consumer electronics applications, motors controls, power electronics controllers, etc.

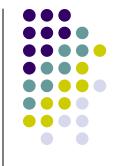

# **Programmability**

    - EEPROM
    - EPROM
    - OTP
    - External Memory
      - FLASH/EEPROM
      - RAM
      - EPROM

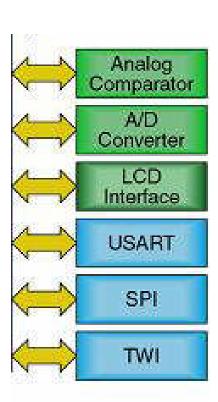

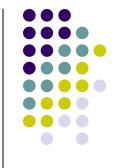

# On-chip MCU Peripherals (1/2)

- I/O ports
  - Number of I/Os
  - Individually or byte programmable
  - Driving capability
- Timers
  - Number of Timers
  - Counting bits
